

A Learning Community for School Leaders

Learning Forward Virginia recently launched its Executive Leadership Program, with over 20 participants. This 30-hour yearlong leadership program is offered in a blended, collaborative format. Participants acquire skills, practices, strategies, and resources to develop their expertise as *agents of change*, create cultures of continuous improvement, build collective responsibility, and provide individual and team support for acquiring and implementing new practices.

Skillful leaders in schools, school systems, and other organizations are essential to lead, manage, and facilitate full implementation of the multiple complex reforms occurring today in Virginia. Teacher leaders, building administrators, district leaders, and other leaders drive the success of any initiative. **This program is specifically designed to develop leaders' capacity to leverage successful change through effective professional learning.**

Working together with colleagues on current, local situations involving complex change in their own organization, participants will study and apply change models and the Standards for Professional Learning as a framework for leading local change that transforms professional learning and supports the integration and implementation of multiple initiatives to achieve remarkable results for educators and students.

Learning Forward VA Executive Leadership Program Cohort 1
